Project objectives

SMART LENDER -APPLICANT CREDIBILITY PREDICTION FOR LOAN APPROVAL
TEAM ID:PNT2022TMID29739

Project Objectives

Lenders look at your **credit score**, income, ongoing EMI's, occupation, age, and repayment history, while evaluating an application for a personal loan.The prediction model not only helps the applicant but also helps the bank minimize the risk and reduce the number of defaulters.

the technical aspects that students would get if they complete this project

1. Knowledge of Machine Learning Algorithms.

2. Knowledge of Python Language with Machine Learning

3. Understand about Classification and Regression kind of problems

4. .Clean the data using different data pre-processing techniques.

5. Real-Time Analysis of the project.

6. Building ease of User Interface (UI)

7. Build web applications using the Flask framework.
